

PROFILE

I am currently a sophomore at Glenbrook South High School. I have been intrigued by the STEM field since I was a little kid, whether it was through the common Math/Science class or even the Science Olympiad. When I took my first CS course during the fall of my freshman year, I realized that Computer Science is what I want to do in life. However, I also explore medicinal topics, because I have always wondered how medicine interlaps with computer science. I cannot wait to see where my life will take me! Only time will tell !!!!
